

VI.3.5-REDEFSEG PROGRAM ESPINIT COMMAND REDEFSEG

Purpose

Command REDEFSEG redefines an ESP Segment.

If any time series definitions are changed the DEF-TS subcommand must be the first subcommand.

For each subcommand the entire subcommand input must entered. For example variables previously defined must be redefined for the ANALYSIS subcommand.

Input Summary

<u>Card</u>	<u>Format</u>	<u>Columns</u>	<u>Contents</u>
1		1-8	'REDEFSEG'
	2X,A8	11-18	Segment identifier
2+			Subcommands - see command DEFSEG
