

Status Report November 2004

FY05 RAXUM Team

Donna Page is having trouble assembling this year's team. So far she has only heard back from two Regions (CR and AR). In the mean while, I (Juliann Meyer) will continue in my role as team leader. If your Region has not responded to Donna's request, please do so as soon as possible.

A survey will be sent out in early December. This survey is a follow-up to the one last year. The survey focuses on where each office is at on making use of the RFC Arcvhice System and its applications. Please fill it out and return it in a timely fashion.

OB5 Testing

APRFC will be the test site for the RFC Archive OB5 delivery including the national verification software. This RFC had already tested many of the individual pieces earlier this fall.

RFC Archive Database Bug/Enhancements List

Since the last update five bugs have been reported and one Enhancement request has been received. Randy Rieman and I are in the process of getting these items added to the list. This new version should be available shortly.
